In Ethan's room,

there was a little boy

with a cold and fever,

and a teddy bear,

and Buffy the beagle,

and a picture of -

children playing and laughing.

Before bedtime he had

a glass of orange juice and some jelly toast

His dad, a chiropractor,
felt a bad subluxation in Ethan's neck.

Dad adjusted Ethan,
and removed the interference
from his little body

With the interference gone

Ethan's body could heal itself.

Good night dad.

Good night teddy bear

Good night Buffy the beagle

Goodbye cold,

Goodbye fever.

Goodnight Ethan,

sleep well.

Good morning sun,

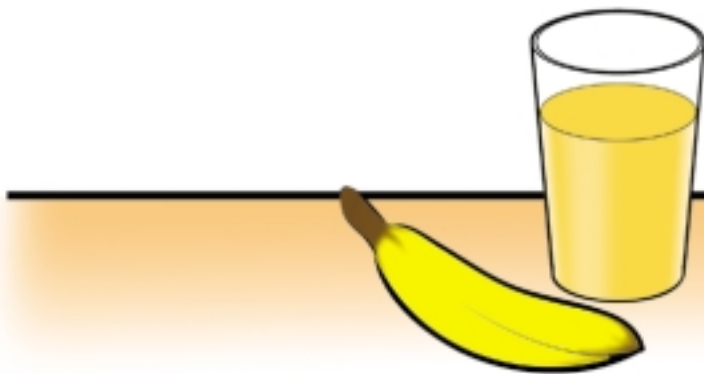

Good morning Buffy the beagle

Good morning mom and dad.

Good morning breakfast,

Good morning fruit and cereal.

Good morning bike and helmet

Good job body, you did awesome.

My body healed itself

without medicine or drugs.

Thanks dad. I love you.

Ethan
