MY **NERVOUS SYSTEM** IS MADE UP OF MY BRAIN, SPINAL CORD AND NERVES. IT **CONTROLS** EVERYTHING MY BODY DOES. SOMETIMES THE BONES IN MY BACK (SPINE) MOVE OUT OF PLACE AND CAUSE MY NERVOUS SYSTEM NOT TO WORK RIGHT. WHEN THIS HAPPENS MY BODY MAY NOT WORK RIGHT AND A LOT OF STUFF THAT ISN'T FUN CAN HAPPEN. BUT WHEN MY BONES ARE IN PLACE AND MY BODY IS WORKING RIGHT I CAN DO LOTS OF FUN STUFF.

This is a very general description of the nervous system and should not be considered complete. "STUFF THAT CAN HAPPEN" are issues commonly associated with malfunction of related areas.
