

SHEPPARD CHIROPRACTIC

ChiroKids

So what is a **ChiroKid**? A **ChiroKid** is a child that receives a chiropractic adjustment to allow his or her body to be as healthy as it can be. Current research shows that 80% of all children are subluxated at birth. Studies also report before the age of six years of age your child will fall 2,500

times. With a two-week time period, permanent injury occurs due to the poor healing, decreased blood flow and misaligned bone. An adjustment corrects the subluxation allowing your child's nervous system to function at 100%, at every waking and sleeping moment. **ChiroKids** that get adjustments are sick less often

and less severely. These **ChiroKids** also miss less days of school. These kids also have fewer emotional and

learning, neurological difficulties associated with childhood. **ChiroKids** receive better grades in school; they can jump higher, run faster, and

throw a ball farther than regular kids. It is easy to be a **ChiroKid**. Just make an appointment by calling **753-KIDS** to get your child checked at **Sheppard Chiropractic**. Once **Dr. Joe** checks and adjusts your son or daughter, they are on their way to expressing their full ability in school, at home and during play.
